WORLD HEART DAY**

29 SEPTEMBER 2022.

The theme of the World Heart day 2022

'USE HEART FOR EVERY HEART'

I**NTERNATIONAL WORLD HEART DAY 29 SEPT 2022:** In India, the

THE WORLD'S, AND THE WORLD HEART FEDERATION'S, BIGGEST AWARENESS-RAISING PLATFORM FOR CVD

World Heart Day is celebrated every year on 29 September.

In May 2012, world leaders committed to **reducing global mortality from non-communicable diseases (NCDs) by 25% by 2025**. Cardiovascular disease (CVD) is accountable for nearly half of all NCD deaths making it the world's number one killer. [World Heart Day](#) is, therefore, the perfect platform for the CVD community to unite in the fight against CVD and reduce the global disease burden. created by the World Heart Federation, **World Heart Day informs people around the globe that CVD, including heart disease and stroke, is the world's leading cause of death claiming 18.6 million lives each year**, and highlights the actions that individuals can take to prevent and control CVD. It aims to **drive action to educate people** that by controlling risk factors such as tobacco use, unhealthy diet and physical inactivity, at least 80% of premature deaths from heart disease and stroke could be avoided.

World Heart Day is a global campaign during which individuals, families, communities, and governments around the world participate in **activities to take charge of their heart health and that of others**. Through this campaign, the World Heart Federation **unites people from all countries and backgrounds** in the fight against the CVD burden and inspires and drives international action to encourage heart-healthy living across the world. We and our members believe in a world where heart health for everyone is a fundamental human right and a crucial element of global health justice.
